

# Multifunctional Gate Box MGB

**EUCHNER**  
More than safety.

# EUCHNER

More than safety.

Headquarters in Leinfelden-Echterdingen

Logistics center in Leinfelden-Echterdingen

Production location in Unterböhringen

## Internationally successful – the EUCHNER company

EUCHNER GmbH + Co. KG is a world-leading company in the area of industrial safety technology. EUCHNER has been developing and producing high-quality switching systems for mechanical and systems engineering for more than 60 years.

The medium-sized family-operated company based in Leinfelden, Germany, employs more than 600 people around the world.

16 subsidiaries and other sales partners in Germany and abroad work for our international success on the market.

## Quality and innovation – the EUCHNER products

A look into the past shows EUCHNER to be a company with a great inventive spirit. We take the technological and ecological challenges of the future as an incentive for extraordinary product developments.

EUCHNER safety switches monitor safety doors on machines and installations, help to minimize dangers and risks and thereby reliably protect people and processes. Today, our products range from electromechanical and electronic components to intelligent integrated safety solutions. Safety for people, machines and products is one of our dominant themes.

We define future safety technology with the highest quality standards and reliable technology. Extraordinary solutions ensure the great satisfaction of our customers.

The product ranges are subdivided as follows:

- ▶ Transponder-coded Safety Switches
- ▶ Transponder-coded Safety Switches with guard locking
- ▶ Multifunctional Gate Box MGB
- ▶ Access management systems (Electronic-Key-System EKS)
- ▶ Electromechanical Safety Switches
- ▶ Magnetically coded Safety Switches
- ▶ Enabling Switches
- ▶ Safety Relays
- ▶ Emergency Stop Devices
- ▶ Hand-Held Pendant Stations and Handwheels
- ▶ Safety Switches with AS-Interface
- ▶ Joystick Switches
- ▶ Position Switches

MGB-AR

MGB-PN

## A handle on the future

The MGB (**Multifunctional Gate Box**) is a unique interlocking or guard locking system for the protection of safety doors on machines and systems.

**The MGB offers that little bit more:** it is more than a safety switch, more than a bolt, and offers a lot more functionality!

### A system that can grow with your needs

Even the basic system comprising handle module and evaluation module (as interlocking module or locking module) includes numerous functions. Whether interlocking, guard locking, escape release or other functions such as push buttons for start/stop, emergency stop, etc. – the MGB meets all your requirements for safety-related applications.

And if your needs grow, the MGB system grows with them. Due to the sophisticated modular design, the evaluation module can quickly become a small control panel.

### Or with an additional control module straight away

In the wide variety of different MGBs, you will definitely find the right one for your application. If not, using the control module you can add lamps, pushbuttons or even completely different operating functions. The control module is permanently fastened to the evaluation module using the connection set.

### Be certain of compliance with standards

Performance Level e in accordance with EN ISO 13849-1 or SIL3 in accordance with EN 62061 – even with the basic system you meet all these requirements. Also the requirements of EN 14119 for protection against tampering are met automatically, as each evaluation module is permanently assigned to a handle module in the unicode version.

#### Everything at a glance

The LED indicator continuously provides you with all important system information. Diagnostics and status check!

#### Flexible color cover adaptation

The colors of the pushbuttons can be adapted as required and interchanged. 5 different color covers are available for this purpose.

#### Auxiliary release

For releasing the guard locking, e.g. in case of a power failure.

#### Interlocking/ locking module

#### Space for ideas...

Control elements and indicators in one housing cover turn the MGB into an all-rounder. Equipped with a start button, an emergency stop and/or other functions, the interlocking/locking module becomes a true control terminal.

#### Solid end stop

A mechanical stop for the handle module mounted in the door is perfectly integrated into the locking module MGB-L.... A marking on the stop makes adjustment easier.

## Safety remains the most important goal

Are you locked in inside the danger area? The optional escape release is intuitive to operate! Whether in the event of a power failure or active guard locking – the red door handle is simply pressed down to leave the danger area quickly.

For protection when working in the danger area you can block the bolt tongue using up to 3 padlocks in the integrated lockout mechanism. Unintentional activation of the interlocking/guard locking is prevented. Is the lockout mechanism to extend automatically when the door is open? No problem with the right handle module.

## Easy to mount and sophisticated design

All MGB modules are optimized for use on fences made of aluminum profiles or steel frames. The MGB is equally suitable for doors hinged on the left or right. Both mounting and changing the actuating direction can be undertaken particularly quickly and easily. Usage on safety doors that are not constructed of profiles, works of course just as well.

The adjustment of safety doors in fences changes over time. With  $\pm 4$  mm tolerance in the x direction as well as  $\pm 5$  mm in the z direction, the MGB is right there where the problem starts. Nevertheless, if a safety door should be even more out of adjustment, the large funnel in the evaluation module "catches" the bolt tongue and guides it into the center position.

Bolt tongue, bolt guide and insertion funnel will also withstand occasional slamming of the door. Robust metal parts protect the MGB against this problem as well. To prevent injuries, the bolt tongue remains retracted with the door open. Do you use hinged doors or sliding doors? The MGB is suitable for both. This aspect eases spare parts stockholding.

## You always have an overview

Four built-in LEDs continuously provide all the necessary system information: power supply available, door closed, bolt tongue inserted, guard locking activated, diagnostics messages – everything can be seen clearly at a glance. This information is of course also available to the control system.

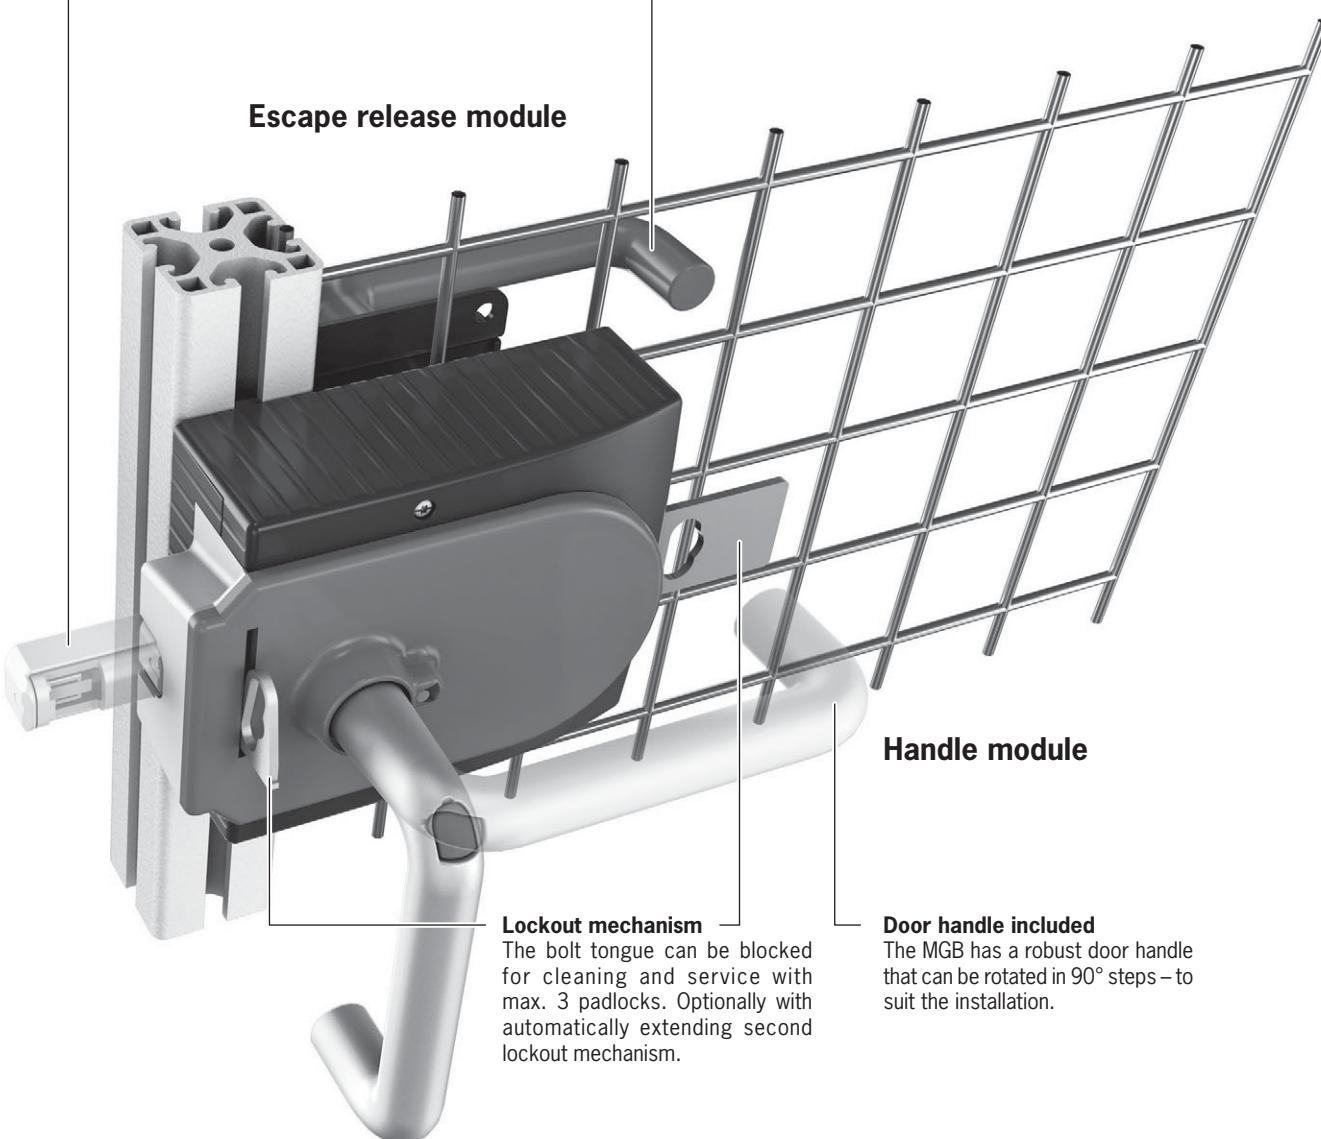

(Read on the next page what else there is in the MGB!)

### Intelligent bolt tongue

The bolt tongue is reliably detected by the transponder as soon as it is inserted in the interlocking/locking module.

### Escape release (optional)

The safety system MGB can be complemented by an escape release module. The escape release enables people accidentally shut in to open the guard locked door from the danger area.

## Sophisticated accessories

Whether you need mounting plates for easier attachment, pre-assembled cables or a long escape release actuator axis (as the safety door needs to be very thick), you will find all you need in the accessories section.

## Economical wiring according to standards

All devices in the family AR can be wired directly in series in a so-called AR series connection without reducing safety or the PL. As a consequence evaluation units are saved. AR devices are also available in the EUCHNER series CES and CET.

The family MGB-AP is particularly suitable for the protection of individual safety doors. If series connection is not necessary, wiring can then be saved. This version has different timing to the AR version.

## Seamless integration by means of bus connection

In the PROFINET version we now also make the wiring easier for you. You define which element is to be integrated and the related function. The MGB supplies the protocol frame with the necessary PROFINET input and output bytes required.

Comprehensive diagnostic information in the form of PROFINET messages makes troubleshooting quick and specific. Due the typical ease with which parameters can be set in PROFINET, even the replacement of the system in case of service is a simple matter and can be undertaken in a few minutes.

## Interlocking or guard locking?

### Functions of the versions MGB-LO, MGB-L1 and MGB-L2 compared

#### Interlocking devices (MGB-LO, without guard locking)

Together with a handle module, the interlocking module makes it possible to interlock the control of movable safety guards. The combination also serves as a mechanical door stop at the same time.

The following switch-on condition applies to the safety outputs F01A and F01B (see also System status table):

- ▶ Safety guard closed (but can be opened at any time)
- ▶ Bolt tongue inserted in the interlocking module

The interlocking module detects the position of the safety guard and the position of the bolt tongue.

The bolt tongue in the handle module is moved into and out of the interlocking module by actuating the door handle.

#### Guard locking devices (MGB-L1 and MGB-L2)

Together with a handle module, the locking module makes it possible to lock movable safety guards. The combination also serves as a mechanical door stop at the same time.

The following switch-on condition applies to the safety outputs F01A and F01B (see also System status table):

- ▶ Safety guard closed
- ▶ Bolt tongue inserted in the locking module
- ▶ Locking arm in locking position (the door cannot be opened)

The locking module detects the position of the safety guard and the position of the bolt tongue. The position of the guard locking is also monitored. The bolt tongue in the handle module is moved into and out of the locking module by actuating the door handle.

When the bolt tongue is fully inserted in the locking module, the locking arm locks the bolt tongue in this position. Depending on the version, this locking is by spring force or solenoid force.

- ▶ **Version MGB-L1:** The locking arm is held in the locked position by spring force and is unlocked by solenoid force (closed-circuit current principle).

- ▶ **Version MGB-L2:** The locking arm is held in the locked position by solenoid force and is unlocked by spring force when the solenoid is switched off (open-circuit current principle).

#### Warning!

The safety guard can be opened immediately in the event of interruption of the solenoid power supply with the version MGB-L2...!

This type may be used only in special cases after strict assessment of the accident risk (see EN ISO 14119:2013, section 5.7.1)!

Example: If the risk of accidental locking inside a safety guard during a power failure is higher than the risk of ineffective guard locking.

#### Flexible adaptation through configuration

The evaluation module can be configured with the aid of DIP switches. Depending on the setting, the evaluation module behaves like an MGB-AP or MGB-AR device. In addition, guard lock monitoring can be switched on or off, if guard locking is installed.

From V2.2.0, an unlocking monitoring function can be activated that signals whether the auxiliary release or escape release was actuated when guard lock monitoring is active.

#### Connection to evaluation units or safe control systems

The safety system MGB can be connected to almost any safe evaluation unit or to any safe control system. For this purpose the short circuit monitoring on the control system is disabled – this function is performed by the MGB. Performance Level e is of course retained.

## The advantages of the Multifunctional Gate Box MGB

- ▶ Suitable for all profiles (optimized for mounting on profiles)
- ▶ Tolerance  $\pm 4$  mm in x direction,  $\pm 5$  mm in z direction
- ▶ Locking force 2000 N
- ▶ The MGB withstands forces of up to 300 Joule
- ▶ Optional escape release with door handle
- ▶ Optional push buttons and indicators can be integrated directly into the housing
- ▶ Stable metal stop prevents damage with bolt tongue extended
- ▶ Marking on the evaluation module as adjustment aid
- ▶ The actuating direction is easy to change without disassembly
- ▶ Hidden mounting holes with slots and metal mounting surfaces
- ▶ Housing material made of high quality, fiber glass reinforced plastic
- ▶ Escape release can also be used on doors with double rebate

## These features are available in all devices in the families MGB-AP and MGB-AR

- ▶ Emergency release
- ▶ Connection by cable entry, max. 1.5 mm<sup>2</sup> or plug connector
- ▶ Plug connector connection, either M23 or M12 12-pin
- ▶ Series connection (only with system family AR, for description see above)
- ▶ Connection of pushbuttons to common power supply DC 24 V
- ▶ Connection of lamps to common ground
- ▶ Operation of guard locking via IMP as control input on PLC (only 3 mA)
- ▶ Monitoring outputs
  - ▶ OD = Door closed
  - ▶ OT = Bolt tongue inserted in the evaluation module  
(in case of guard locking devices ready for operation of the solenoid)
  - ▶ OL = Guard locking solenoid kept in locked position
  - ▶ OI = Diagnostics, there is a fault

## System families at a glance

The tables on this page provide you a quick overview of the features and strengths of the related product family as well as the possible expansions.

### What system families are available?

System family	Symbol	Use
MGB-AP		If series connection is not necessary, the number of terminals can be reduced using this system family.
MGB-AR		Linking of several safety guards on one shutdown path. As a consequence several safety doors can be very simply polled using one evaluation unit or two control system inputs.
MGB-PN		How to utilize the maximum functionality of the MGB in a Profinet environment. Ease of replacement and flexibility are in the foreground here.

It is possible to switch between the MGB-AP and MGB-AR families using DIP switches.

## System families compared

The tables provide you a quick overview of the features and strengths of the related product family as well as the possible expansions.

Feature / special aspect	System family

## Approvals

To demonstrate conformity, the Machinery Directive also includes the possibility of type examination. Although all relevant standards are taken into account during development, we have all our safety switches subjected to additional type examinations by a notified body.

Many of the devices listed in this catalog have been tested by the German Social Accident Insurance association (DGUV), formerly the employers' liability insurance association (BG), and are given in the lists from the DGUV. With the aid of the approval symbols listed below you can quickly see which approvals are available for the related devices:

	Devices with this symbol are type examined by the German Social Accident Insurance association (DGUV) – formerly the employers' liability insurance association (BG)
	All MGB devices comply with the stipulations of Underwriter Laboratories (UL) and carry the symbol

## Explanation of symbols

### System families

	System family MGB-AP for separate operation
	System family MGB-AR for separate operation or series connection with other AR devices
	System family MGB-PN for operation in PROFINET environment

### Safety category/guard locking

	Suitable up to category 4 or Performance Level e in accordance with EN ISO 13849-1
	Guard locking for personnel protection
	Guard locking for process protection

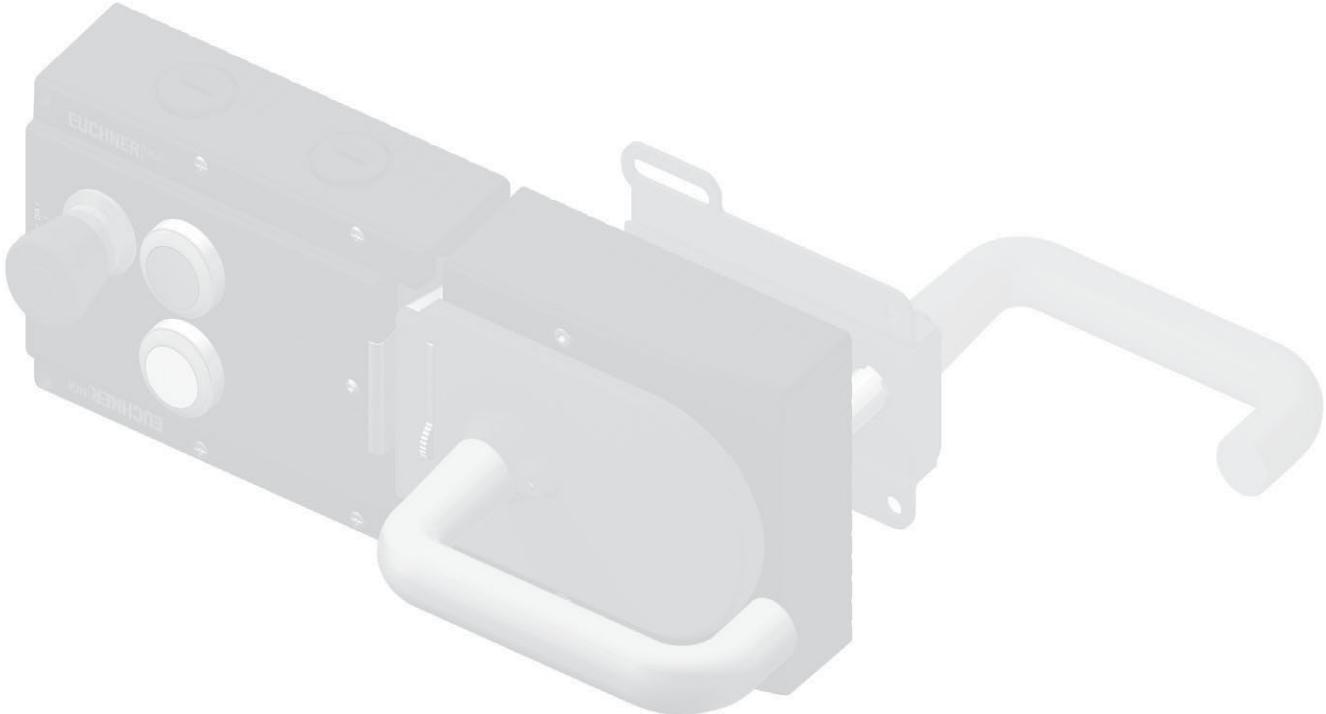

### Controls and indicators

	Emergency stop according to ISO 13850
	Illuminated emergency stop
	Emergency stop with monitoring contact

	Machine stop (black-silver)
	Machine stop (black-silver) with monitoring contact
	Illuminated pushbutton
	Pushbutton not illuminated
	LED
	Selector switch form V
	Selector switch form V illuminated
	Key-operated selector switch form V
	Key-operated selector switch form L
	Pushbutton labeling "Unlocked"
	Pushbutton labeling "Locked"
	Other possible button labels

**Complete sets system families MGB-AP/MGB-AR**

**E**

Cable entry

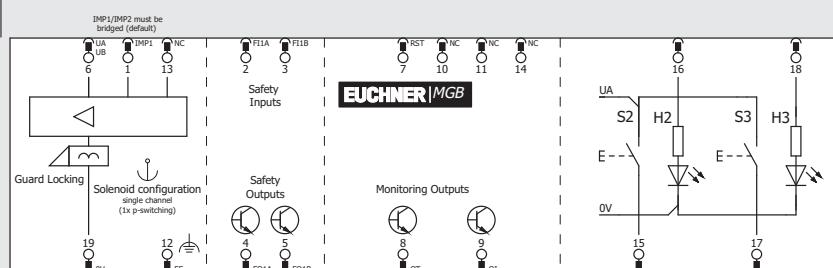

**F**

Plug connector M22

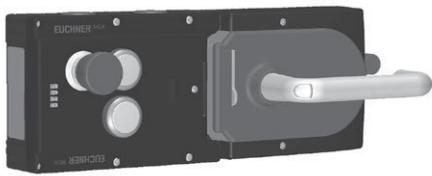

**G**

Plug connector M23

## Locking sets MGB-L1-... (guard locking by spring force) with 3 controls or indicators

- ▶ Can be connected in series with other AR devices (e.g. CES-AR, CET-AR and CTP-AR)
- ▶ With cable entry or plug connector
- ▶ Integrated controls and indicators

### Details

#### Release monitoring activated

When release monitoring is active, the system enters into a latching fault when the escape release or auxiliary release is actuated.

#### Emergency stop with monitoring contact

Additional normally open contact in the emergency stop, e.g. as monitoring contact for the control system.

#### Connection for enabling switch

The devices have an M12 plug connector for the direct connection of an enabling switch (e.g. ZSA, order no. 110560).

#### Lens set

The color of the pushbutton can be selected using the lens set 120344 included.

#### Adhesive labels

Devices with adhesive labels have pre-formed recesses. The adhesive labels enclosed (standard size 12.5 x 27 mm) can be affixed in these recesses.

#### Selector switch

Selector switch with 2 positions (form V, 90°). The switch latches in both positions.

#### Machine stop

Version as emergency stop but in gray/yellow, e.g. as machine stop.

Important: Do not use as emergency stop!

### Details

#### Guard lock monitoring switched off

As the default setting on delivery, the guard lock monitoring is switched off via the internal DIP switches with these evaluation modules. Consequently, the guard locking is suitable only for process protection. Safety outputs F01A and F01B do not depend on the state of guard locking.

**Notice:** Devices affected are marked with this symbol.

#### Emergency stop with monitoring contact

Additional normally open contact in the emergency stop, e.g. as monitoring contact for the control system.

### Lens set

The color of the pushbutton can be selected using the lens set 120344 included.

### Adhesive labels

Devices with adhesive labels have pre-formed recesses. The adhesive labels enclosed (standard size 12.5 x 27 mm) can be affixed in these recesses.

## Handle module MGB-H-... (from V3.0.0)

- ▶ Intelligent bolt tongue with transponder
- ▶ Fold-out lockout mechanism
- ▶ Door handle

### Bolt tongue

The bolt tongue is reliably detected by transponder as soon as it is inserted in the evaluation module.

### Lockout mechanism (fold-out)

For cleaning and service on the machine the bolt tongue can be locked with max. 3 padlocks. The lockout mechanism is simply folded out and prevents the operation of the handle.

### Door handle

The MGB has a robust door handle that can be rotated in 90° steps to suit all installations. The actuating direction can be changed very easily for doors hinged on the left or right.

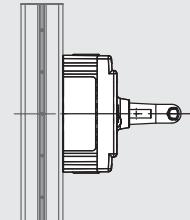

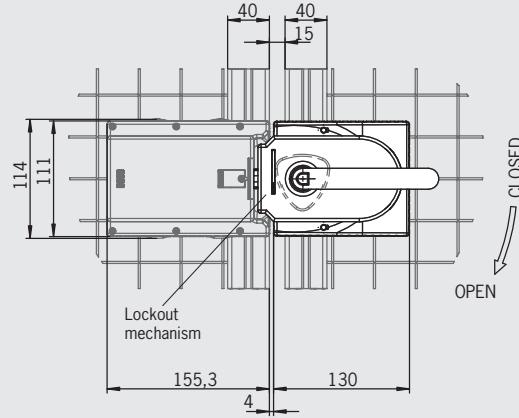

### Door knob

As an alternative to the door handle the handle module can also be equipped with a door knob.

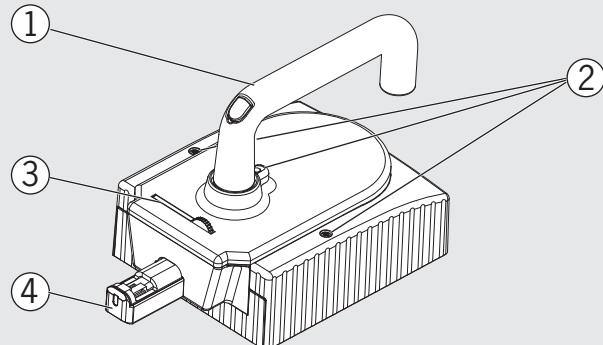

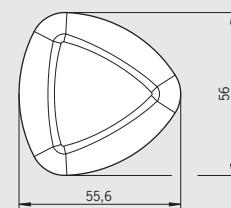

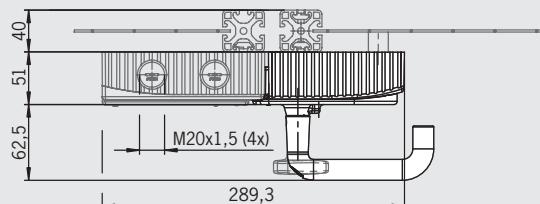

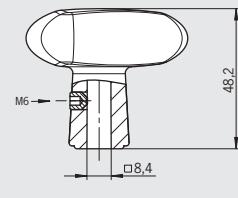

## Handle module MGB-H-... (from V3.0.0) with fold-out lockout mechanism

**Handle module MGB-H... with automatically extending lockout mechanism (from V3.0.0)**

- ▶ Intelligent bolt tongue with transponder
- ▶ Fold-out lockout mechanism (as on standard version)
- ▶ Second automatically extending lockout mechanism
- ▶ Door handle

**Bolt tongue**

The bolt tongue is reliably detected by transponder as soon as it is inserted in the evaluation module.

**Lockout mechanism (automatically extending and fold-out)**

For cleaning and service on the machine the bolt tongue can be locked with max. 3 padlocks.

The lockout mechanism extends automatically on the actuation of the handle and prevents the operation of the handle in the safe state. In addition, the fold-out lockout mechanism can be used.

**Door handle**

The MGB has a robust door handle that can be rotated in 90° steps to suit all installations.

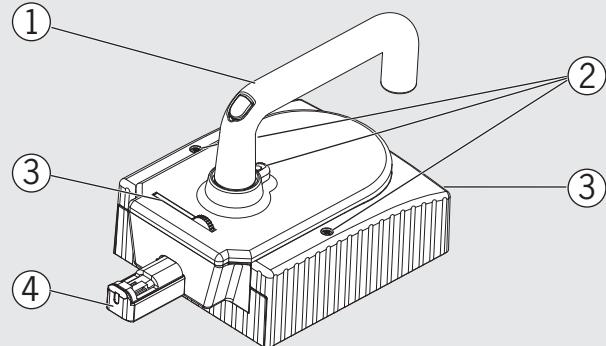

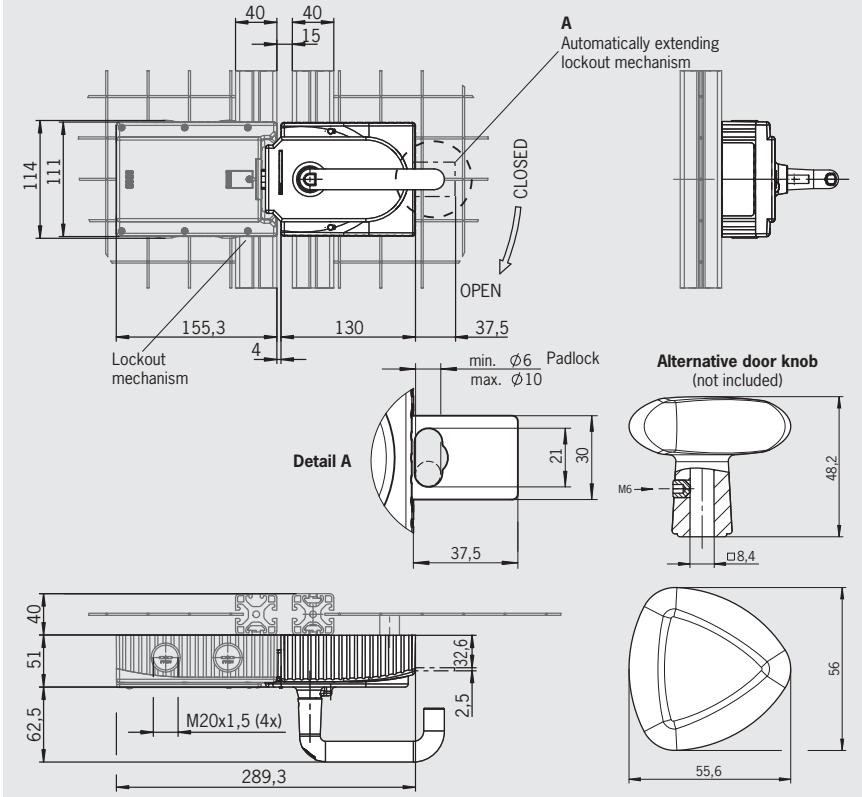

The actuating direction can be changed very easily for doors hinged on the left or right.

**Door knob**

As an alternative to the door handle the handle module can also be equipped with a door knob.

## Escape release module MGB-E...

► Door handle red

### Escape release

The safety system MGB can be equipped with an escape release module. The escape release enables people shut in to open the guard locked door from the danger area. It is only necessary to actuate the door handle.

The actuating direction automatically adapts to the actuating direction of the handle module and does not need to be changed.

The actuation axis supplied is suitable for profiles up to 40 mm.

### Extended actuation axis

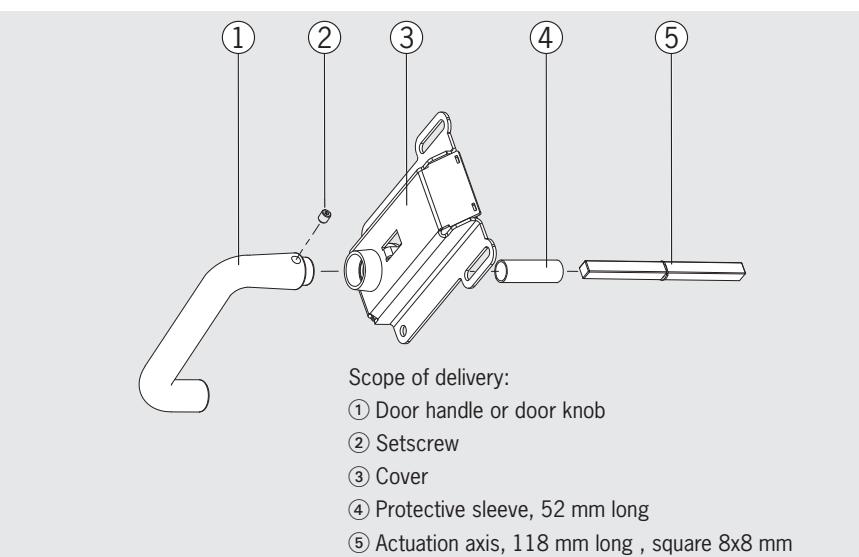

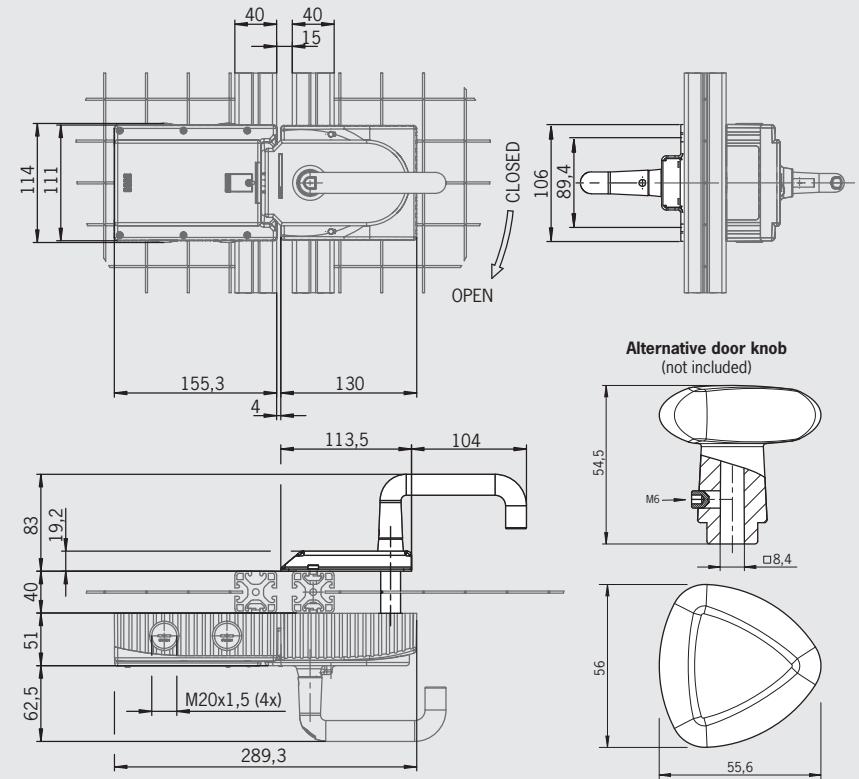

Optionally, a 250-mm long actuation axis (instead of 110 mm) can be ordered for thicker doors or profiles > 40 mm.

The axis can be shortened to the required dimension.

## Escape release module MGB-E...

**Dimension drawing** (diagram shows door hinged on the right)

## Emergency unlocking for auxiliary release/adhesive labels

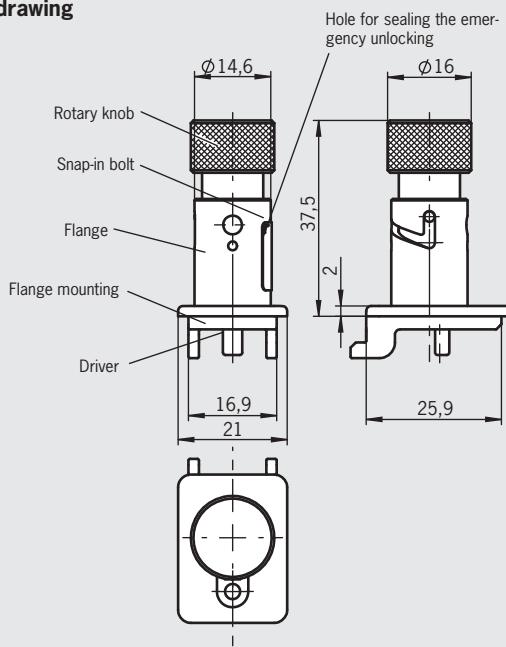

### ► Emergency unlocking

#### Emergency unlocking MGB-A...

##### Function

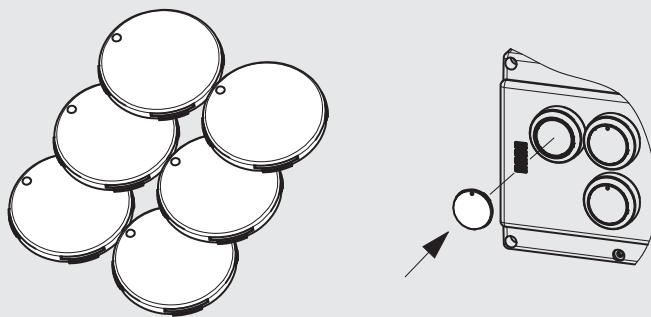

The MGB can be unlocked manually using the emergency unlocking. The rotary knob is pushed and then turned by 90° to unlock. The snap-in bolt engages in the hole on the flange. To release the emergency unlocking, push the snap-in bolt inward and simultaneously turn the rotary knob back to its initial position. The emergency unlocking can be sealed in free position.

## Mounting plates for modules MGB-...-AR... and MGB-...-AP...

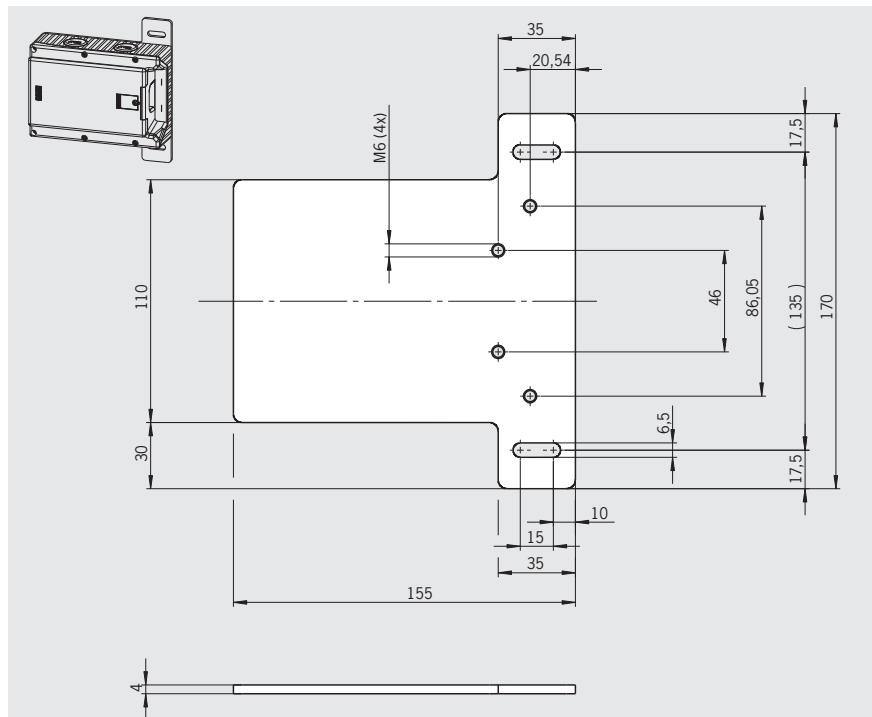

- ▶ Easy and quick mounting (only two screws required)
- ▶ Quick module replacement
- ▶ Robust stainless steel plate
- ▶ Suitable for doors hinged on the right or left

### Mounting plate for evaluation module

Suitable for all interlocking or locking modules in the system families AR and AP. Two screws are sufficient for fastening the mounting plates.  
**Important:** Only use if the handle module is also fastened to a mounting plate.

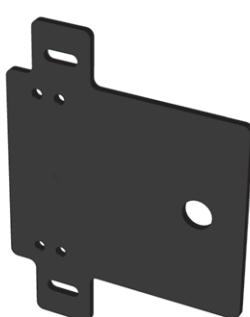

### Mounting plate for evaluation module

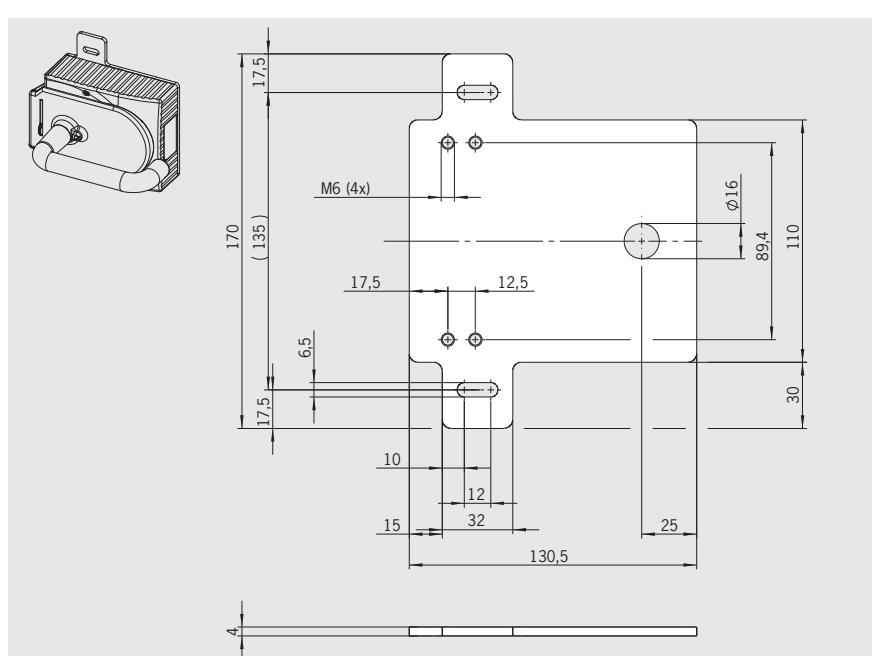

### Mounting plate for handle module

Suitable for all MGB handle modules. Two screws are sufficient for fastening the mounting plates.  
**Important:** Only use if the evaluation module is also fastened to a mounting plate.

### Mounting plate for handle modules

## Expand your options - the control module for the MGB

- ▶ Space for up to 6 controls and indicators
- ▶ Ideal expansion solution for the MGB system
- ▶ A large amount of design flexibility

In the control module it is possible to integrate controls such as push buttons, emergency stop, key-operated switches, selector switches or even indicators as required. In this way a complete functional control panel can be built up.

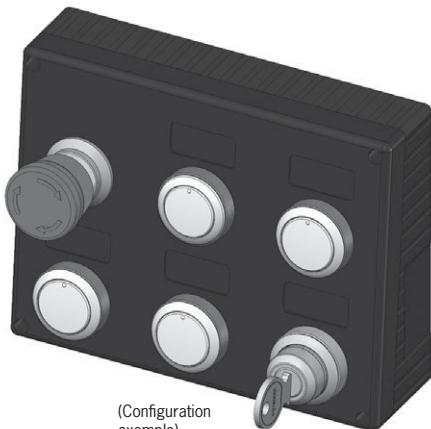

Even the MGB basic system comprising handle module and interlocking/locking module includes numerous functions. And if requirements grow, the MGB system simply grows with them with the aid of the control module.

Furthermore, the control module forms an attractive unit together with the MGB.

An elegant alternative to the gray switch boxes that were common in the past.

### Your advantages

- ▶ Simple expansion of the MGB system
- ▶ Flexible configuration with standard components
- ▶ Attractive solution from one mold
- ▶ Functional unit, all control functions in one place
- ▶ Alternative to previous control terminals

**Control modules MGB-C...**

(Configuration example)

**Details****Emergency stop with monitoring contact**

Additional normally open contact in the emergency stop, e.g. as monitoring contact for the control system.

**Further information**

- Dimension drawings see p. 79
- Technical data see p. 83
- Accessories and spare parts see p. 82

## Technical data

### Empty housing

Parameter	Value
Housing material	Reinforced thermoplastic
Ambient temperature	-20 ... 55 °C
Degree of protection acc. to EN 60529	IP 65
Degree of contamination /material group	3 (industrial)
External connection	2 x cable entry M20x1.5
Internal connection (plug-in spring terminals)	0.2 ... 1.5 mm <sup>2</sup>

### Controls

Parameter	Value
Mech. life	
- Pushbutton	1x10 <sup>6</sup>
- Emergency stop	5x10 <sup>4</sup>
- Selector switch	3x10 <sup>5</sup>
- Key-operated switch	3x10 <sup>4</sup>
Ambient temperature	-20 ... 55 °C
Degree of protection acc. to EN 60529	IP65 (fitted), Key-operated switch IP54

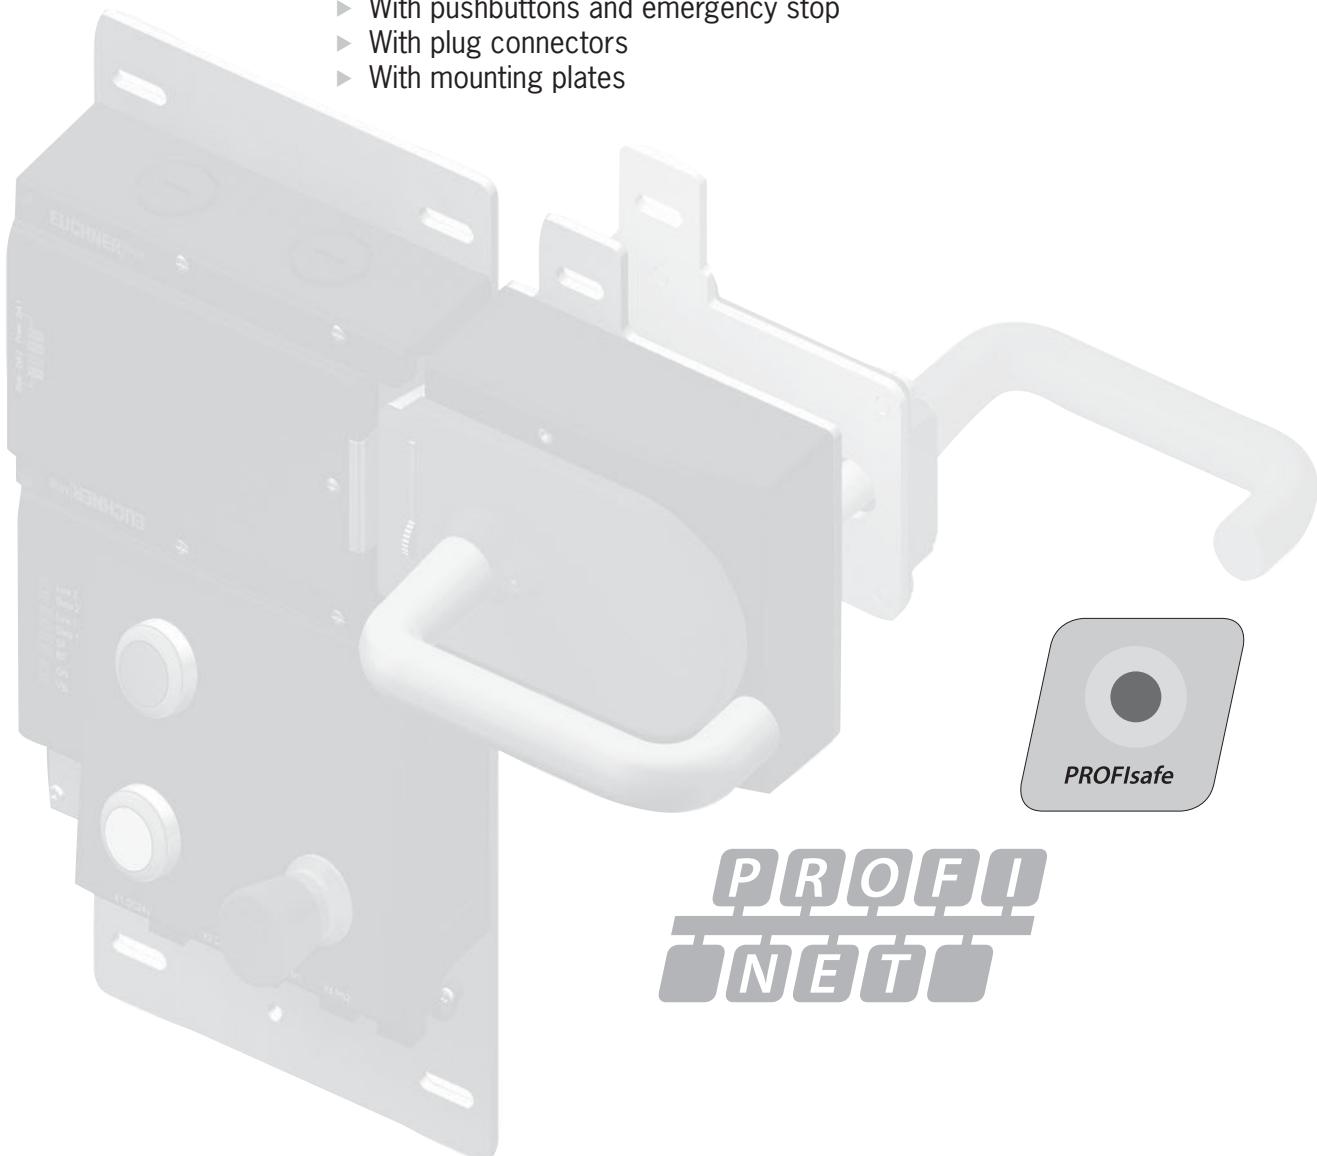

### Switching elements, LED

Parameter	Value
Life at 10 mA/24 V DC	
...GU...	1x10 <sup>6</sup>
...GM...	5x10 <sup>4</sup>
Ambient temperature	-20 ... 55 °C
Operating voltage	
- Switching elements	5 ... 35 V
- LED	24 V
Operating current	
- Switching elements	1 ... 100 mA
- LED	max. 30 mA permissible
Breaking capacity max.	250 mW
Connection	Connector 2.8 x 0.8 mm
Contact material	Au
Shock resistance according to IEC 60068-2-27	15 g
Vibration resistance	5 g (10 .. 500 Hz)
IEC 60068-2-6	
Positively driven	According to IEC 60947-5-1
...GM...	(positively driven NC contact)

- ▶ Pre-assembled on mounting plates
- ▶ Integrated Profinet RT switch

## Details

### Profinet connection

Connection via push-pull plugs according to IEC 61076-3-117, variant 14.

### Profinet RT switch

Point-to-point topology network structure due to integrated RT switch.

### Flexible usage as interlocking or guard locking

By means of the corresponding evaluation of the safe device data by the control system, usage can be either as interlocking or guard locking (with or without monitoring).

### Lens set

The color of the pushbutton can be selected using the lens set 120344 included.

## Further information

## Data ranges

You will require the corresponding GSD file in GSDML format in order to integrate the MGB system:  
GSDML-Vx.x-EUCHNER-MGB\_110026-YYYYMMDD.xml

You can find the GSD file in the download area at [www.euchner.de](http://www.euchner.de).

Prior to setup, the GSD file must be imported into the configuration software of the control system (see manual for your control system).

## Locking sets MGB-L1...-PN... (guard locking by spring force) with 4 controls or indicators

- ▶ Integrated controls and indicators
- ▶ Pre-assembled on mounting plates
- ▶ Integrated Profinet RT switch

### Details

#### Profinet connection

Connection via 7/8" plugs according to ANSI/B3.55M-1981 and M12 plugs according to IEC 61076-2-101.

#### Profinet RT switch

Point-to-point topology network structure due to integrated RT switch.

#### Flexible usage as interlocking or guard locking

By means of the corresponding evaluation of the safe device data by the control system, usage can be either as interlocking or guard locking (with or without monitoring).

#### Illuminated emergency stop

Emergency stop with illumination that can be controlled as required.

### Lens set

The color of the pushbutton can be selected using the lens set 120344 included.

#### Multicode evaluation

Every suitable handle module is detected by the safety switch.

### Further information

- ▶ Dimension drawings see p. 121
- ▶ Technical data see p. 120
- ▶ Accessories and spare parts see p. 93

**Locking sets MGB-L2...-PN... (guard locking by solenoid force)**  
without controls or indicators

- ▶ Pre-assembled on mounting plates
- ▶ Integrated Profinet RT switch

## Details

### Profinet connection

Connection via push-pull plugs according to IEC 61076-3-117, variant 14.

### Profinet RT switch

Point-to-point topology network structure due to integrated RT switch.

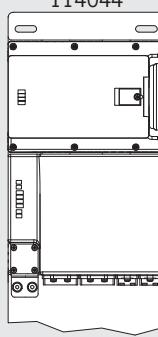

### Flexible usage as interlocking or guard locking

By means of the corresponding evaluation of the safe device data by the control system, usage can be either as interlocking or guard locking (with or without monitoring).

## Further information

## Details

### Profinet connection

Connection via push-pull plugs according to IEC 61076-3-117, variant 14, or 7/8" plugs according to ANSI/B93.55M-1981 and M12 plugs according to IEC 61076-2-101.

### Profinet RT switch

Point-to-point topology network structure due to integrated RT switch.

### Flexible usage as interlocking or guard locking

By means of the corresponding evaluation of the safe device data by the control system, usage can be either as interlocking or guard locking (with or without monitoring).

### Illuminated emergency stop

Emergency stop with illumination that can be controlled as required.

### Lens set

The color of the pushbutton can be selected using the lens set 120344 included.

**Locking sets MGB-L2...-PN... (guard locking by solenoid force)**  
with 6 controls or indicators

- ▶ Integrated controls and indicators
- ▶ Pre-assembled on mounting plates
- ▶ Integrated Profinet RT switch

## Details

### Profinet connection

Connection via push-pull plugs according to IEC 61076-3-117, variant 14.

### Profinet RT switch

Point-to-point topology network structure due to integrated RT switch.

### Flexible usage as interlocking or guard locking

By means of the corresponding evaluation of the safe device data by the control system, usage can be either as interlocking or guard locking (with or without monitoring).

### Illuminated emergency stop

Emergency stop with illumination that can be controlled as required.

## Data ranges

You will require the corresponding GSD file in GSDML format in order to integrate the MGB system:  
 GSDML-Vx.x-EUCHNER-MGB\_110026-YYYYMMDD.xml

You can find the GSD file in the download area at [www.euchner.de](http://www.euchner.de).

Prior to setup, the GSD file must be imported into the configuration software of the control system (see manual for your control system).

## Assignment of the terminal plugs

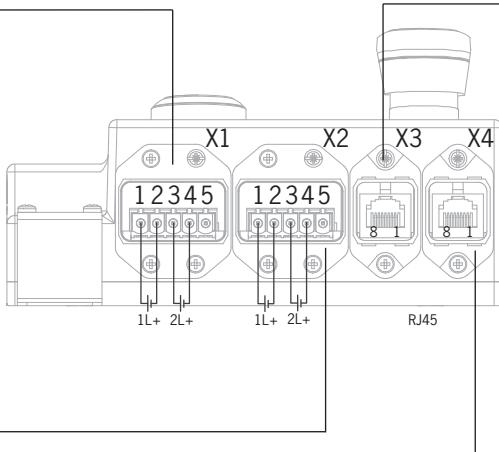

### Terminal assignment for version with push-pull plugs

Pin	Description
X1.1	1L+ operating voltage DC 24 V
X1.2	1M operating voltage 0 V
X1.3	2L+ auxiliary voltage* DC 24 V
X1.4	2M auxiliary voltage* 0 V
X1.5	Function earth

X2: For looping through for connected devices

Pin	Description
X2.1	1L+ operating voltage DC 24 V
X2.2	1M operating voltage 0 V
X2.3	2L+ auxiliary voltage* DC 24 V
X2.4	2M auxiliary voltage* 0 V
X2.5	Function earth

\* The auxiliary voltage is not required for the MGB system

Pin	Description
X3.1	Receive Data +RD
X3.2	Receive Data -RD_N
X3.3	Transmit Data +TD
X3.4	Ground GND (RJ45)
X3.5	Ground GND (RJ45)
X3.6	Transmit Data -TD_N
X3.7	Ground GND (RJ45)
X3.8	Ground GND (RJ45)

X4: For looping through for connected devices (integrated RT switch)

Pin	Description
X4.1	Receive Data +RD
X4.2	Receive Data -RD_N
X4.3	Transmit Data +TD
X4.4	Ground GND (RJ45)
X4.5	Ground GND (RJ45)
X4.6	Transmit Data -TD_N
X4.7	Ground GND (RJ45)
X4.8	Ground GND (RJ45)

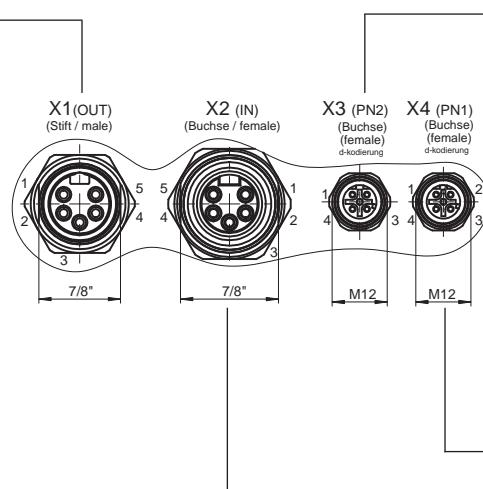

### Terminal assignment for version with 7/8" and M12 plugs

Pin	Description
X1.1	N2 auxiliary voltage *0 V
X1.2	N1 operating voltage 0 V
X1.3	Function earth
X1.4	L1 operating voltage DC 24 V
X1.5	L2 auxiliary voltage* DC 24 V

X2: For looping through for connected devices

Pin	Description
X2.1	N2 auxiliary voltage *0 V
X2.2	N1 operating voltage 0 V
X2.3	Function earth
X2.4	L1 operating voltage DC 24 V
X2.5	L2 auxiliary voltage* DC 24 V

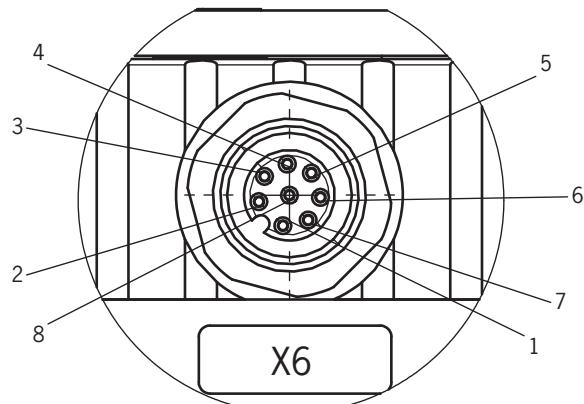

\* The auxiliary voltage is not required for the MGB system

Pin	Description
X3.1	Transmit Data +TD
X3.2	Receive Data +RD
X3.3	Transmit Data -TD_N
X3.4	Receive Data -RD_N
	Function earth on plug housing

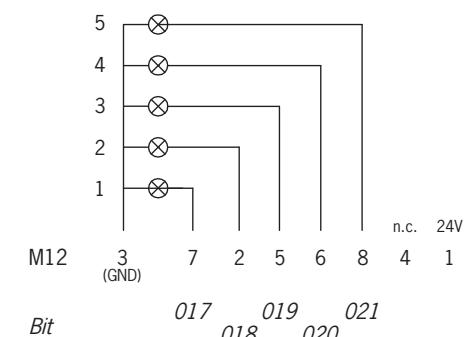

Pin	Description
X4.1	Transmit Data +TD
X4.2	Receive Data +RD
X4.3	Transmit Data -TD_N
X4.4	Receive Data -RD_N
	Function earth on plug housing

## Terminal assignment, plug connector X6 for stacklight module

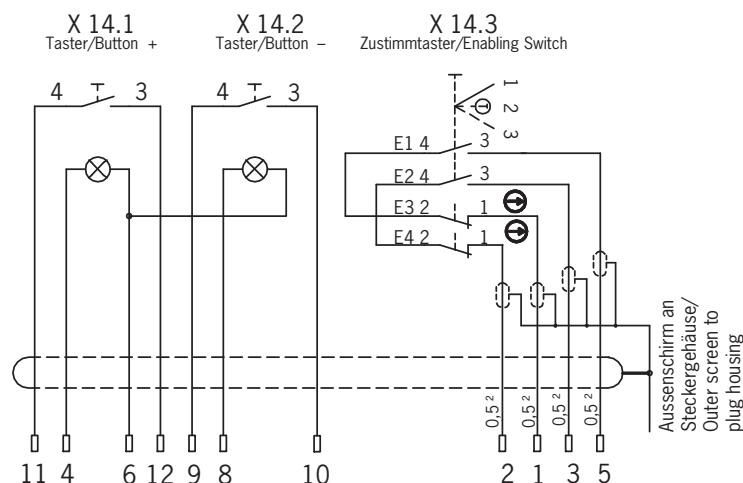

M 12

Built-in plug connector (8-pin/socket), aligned  
View of connection side

## Terminal assignment, plug connector X14 for enabling switch (e.g. ZSB077029)

**Technical data**

Parameter	Value
S <sub>ar</sub> max. door position	65 mm
Housing material	Fiber glass reinforced plastic Die-cast zinc, nickel-plated, stainless steel, powder-coated sheet steel
Dimensions	See dimension drawing
Weight of MGB-L.B (bus module, locking module, and operating module with mounting plate)	4.05 kg
Weight of handle module with mounting plate	1.20 kg
Weight of escape release module with mounting plate	1.15 kg
Ambient temperature	-20 ... +55 °C
Degree of protection	IP54
Safety class	III
Degree of contamination	3
Installation position	Any
Locking force F <sub>zh</sub>	2000 N
Connection options, power supply	2 x push-pull power <sup>1)</sup> or 2 x plug connector 7/8" according to ANSI/B93.55M-1981
Connection type, bus	2 x RJ 45, push-pull, according to IEC 61076-3-117 variant 14, screened <sup>1)</sup> or 2 x M12 plug connector (d-coded) according to IEC 61076-2-101
Connection cable, bus	Profinet I/O cable, at least cat. 5e
Operating voltage U <sub>B</sub>	DC 24 V +10%/-15% (PELV – see electrical connection)
Current consumption, max.	500 mA
Max. feed-in current in the connection block (push-pull plug connector)	4000 mA
Fuse protection for power supply, external	Min. 1 A slow-blow
Safety outputs	Profisafe according to IEC 61784-3-3
Rated insulation voltage U <sub>I</sub>	75 V
Rated impulse withstand voltage U <sub>imp</sub>	0.5 kV
Resilience to vibration and shock	In accordance with EN 60947-5-3
EMC protection requirements	In acc. with EN 61000-4 and DIN EN 61326-3-1
Switching frequency max.	1 Hz
Risk times max. (switch-off times) <sup>2)</sup>	
- Emergency stop	220 ms
- Enabling switch	220 ms
- Operating mode selector switch	220 ms
- Door position	550 ms
- Bolt position	550 ms
- Guard locking	550 ms
<b>Reliability values according to EN ISO 13849-1</b>	
Category	4 (EN 13849-1:2008-12)
Performance Level	PL e (EN 13849-1:2008-12)
MTTF <sub>d</sub> <sup>3)</sup>	91 years
DC	99%
Mission time	20 years
PFH <sub>d</sub> <sup>3)</sup>	2.54 x 10 <sup>-8</sup> /h
PFH <sub>d</sub> for the evaluation of the emergency stop	2.5 x 10 <sup>-8</sup> /h
B <sub>10d</sub> <sup>4)</sup>	1 x 10 <sup>5</sup>
- Emergency stop	According to switch information from manufacturer
- Enabling switch	

1) The document PROFINET Cabling and Interconnection Technology from the PNO aids in the correct selection of wiring.

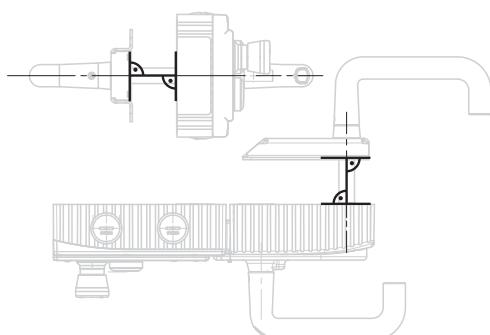

2) The risk time is the max. time between the change in the input status and the deletion of the corresponding bit in the bus protocol.

3) Fixed failure rate without consideration of faults in wearing parts.

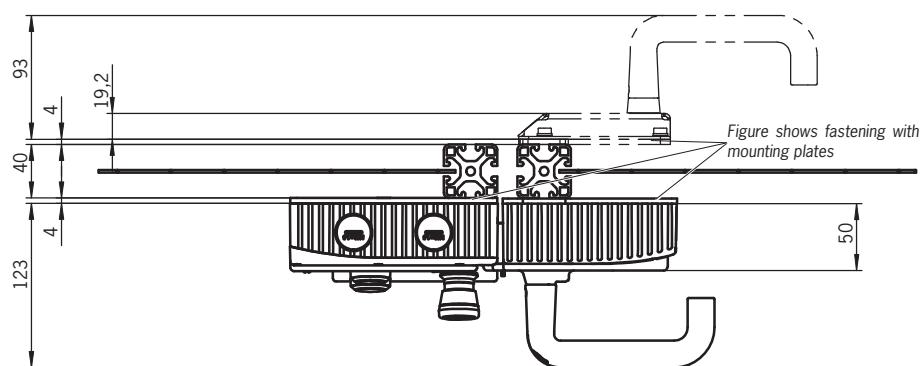

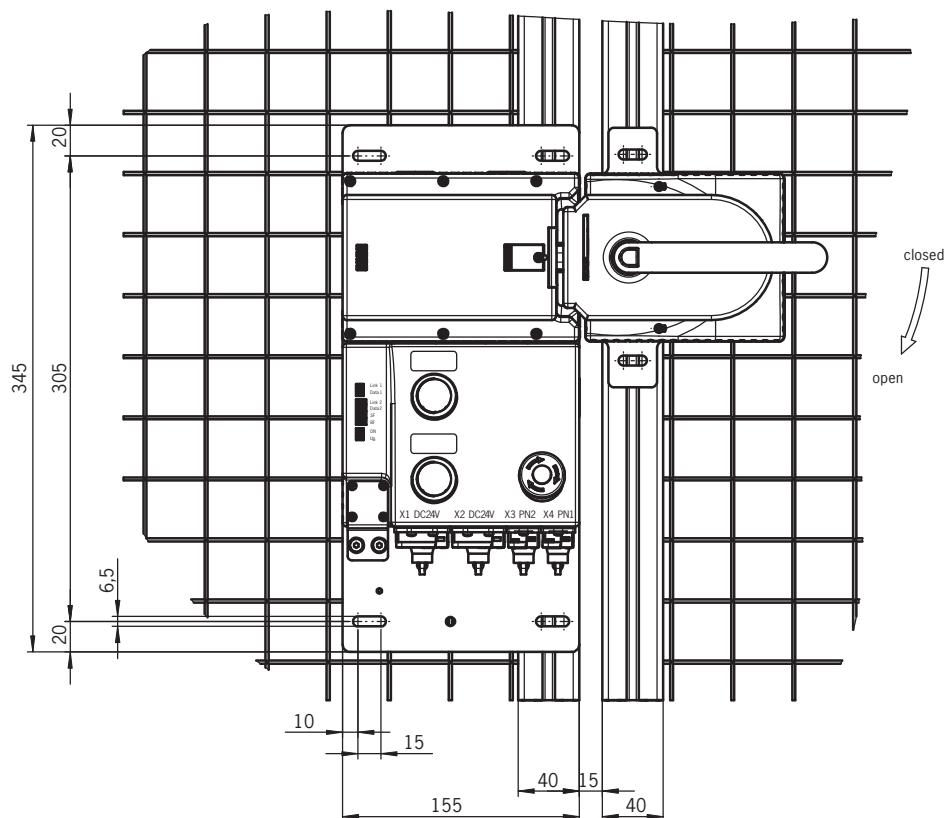

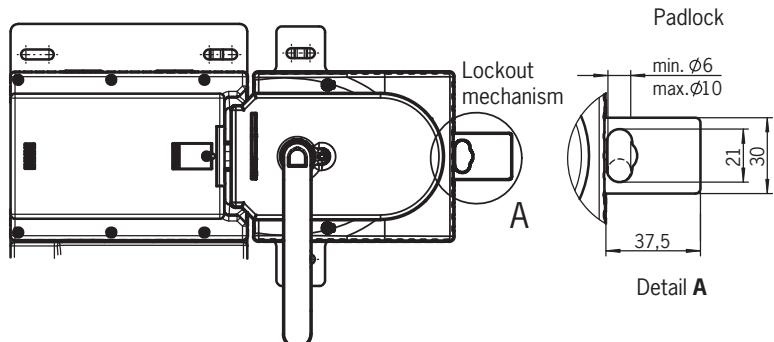

4) Information regarding wearing parts without consideration of fixed failure rates in electronic components.

## Dimension drawings

# How to find "your" MGB:

Considerations in relation to the output family

	MGB-AP for separate operation
	MGB-AR for separate operation or series connection with other AR devices
	MGB-PN for operation in PROFINET environment

## Step 1 Interlocking or guard locking?

-	MGB-LO...: Interlocking (only monitoring of the door position)
	MGB-L1...: Guard locking by spring force (Closed-circuit current principle)
	MGB-L2...: Guard locking by solenoid force (Open-circuit current principle)

1

## Step 2 Select number of controls/indicators required

Contact assembly/ counting direction	
---	--

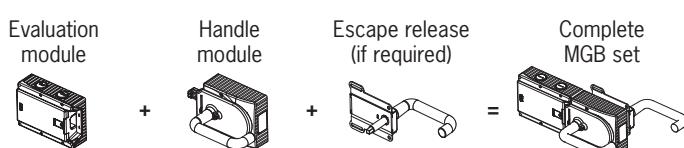

2

## Step 3 Select type of controls and indicators

	Emergency stop according to ISO 13850
 / 	Illuminated emergency stop / emergency stop with monitoring contact
 / 	Machine stop / machine stop with monitoring contact
 / 	Pushbutton, illuminated / not illuminated (Different colors available)
	LED (Different colors available)
 / 	Selector switch form V, 2-stage, optionally illuminated (Different versions available. For details see ordering table and description of the details)
 / 	Key-operated selector switch form L or V, 2-stage (Different versions available. For details see ordering table and description of the details)

3

## Step 4 Select complete MGB set with the required configuration

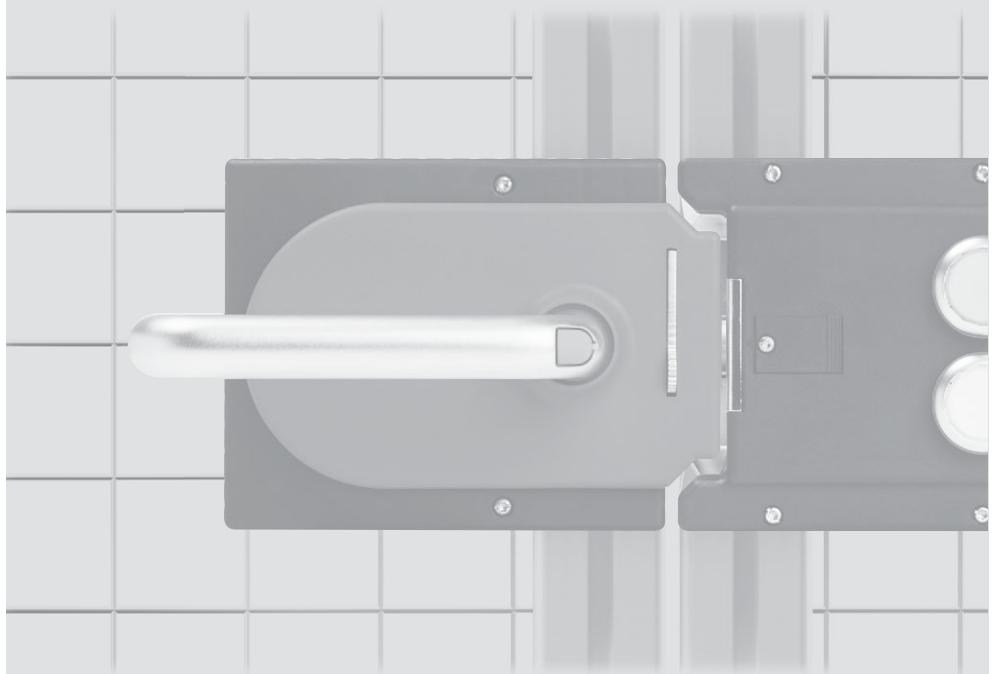

4

Have you not been able to find  
the configuration you require?

You will find further information at [www.euchner.de](http://www.euchner.de). Alternatively our product consultants are available to assist you from the factory or on site.
